

## Breakdown of Crime Risk at Virginia Beach

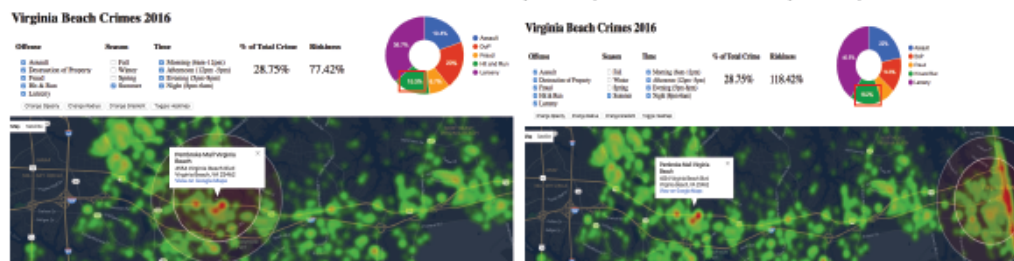

## Summer vs. Winter

## Time and Crime Type

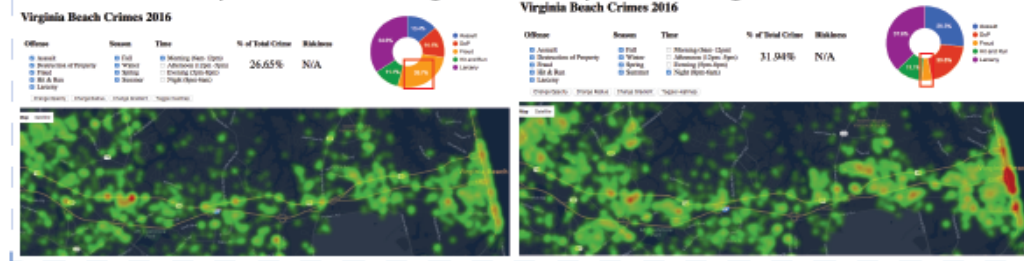

**Night vs Evening-** Crimes occur most at night, and least in the evening

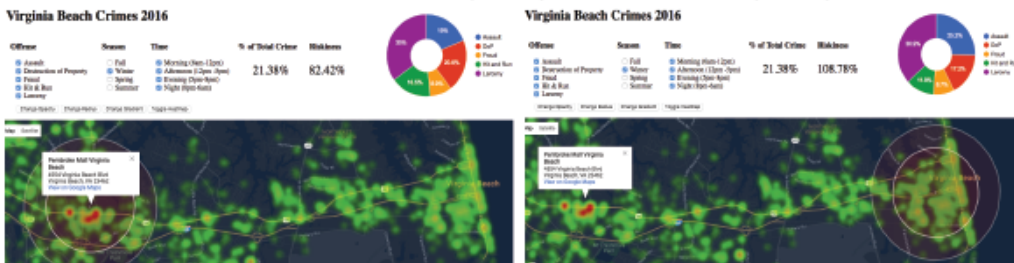

Summer Hit and Run - riskier at the beach (16.2%) than at the mall (15.3%)

Fraud - More frequent in the morning (26.7%) compared to at night ( 4.2%)

Winter Hit and Run - riskier at the mall (16.5%) than at the beach (11.9%)

Neighborhood - King's Grant Peninsula is safer than similar neighborhoods

The major key insight is that there is a different distribution of crimes for the mall and beach areas during the winter and summer seasons. During the winter, the riskiness is greater at the mall than in the summer. During the summer, the riskiness is greater at the beach than during the winter.

The major key insight is that there is a different distribution of crime during the time of the day. Surprisingly, evening time is the safest. There are more aggressive times at night. Fraud is reported frequently during the morning. Police force can use this information to staff more experienced police officers at night, and staff retiring officers, or rookies during the day
